

Are you interested in learning more about severe weather ? Have you ever been to a weather spotting class? What are the ingredients that form a thunderstorm? Where is the safe place to be while weather spotting? Understand the role of radio operations during severe weather.

Join the National Weather Service and the Central Ohio Severe Weather Network on Saturday March 28, 2020 at 9 AM at the Bruce E. Siegel Center to learn more. The center is located at Mount Carmel Hospital, 6001 East Broad Street, Columbus, Ohio, 43213.

This seminar is where all of us start, with the basics. Lots of things change over time and this is the place to catch up. You'll have an opportunity to learn how a spotter report can aid in the safety of life and property during severe weather. Learn and understand how weather spotters contribute to the NWS mission.

The Siegel Center is located on the northwest corner of the hospital complex just west of the emergency room entrance. See the map below for the hospital location.

Parking is available northwest and southwest of the Siegel Center on surface lots.

Registration is required as seating is limited. Go to <http://bit.ly/2GnQbaZ> to register. If further information is required, please send an e-mail to:
